Routers are expected to play an important role in the IP-based wireless data network. Although substantial number of techniques have been proposed to improve wireless network performance under dynamic wireless channel conditions and host mobility, ...

We consider a time-slotted W-CDMA system for mobile stations which are connected to the wire internet. We first present an architecture for such a system that is based on a request-permissic protocol incorporating power control for "Best Effort" transmissions ...

Bibliometrics: Downloads (6 Weeks): 9, Downloads (12 Months): 17, Citation Count: 0

PMPI extends the PMPI profiling interface to support multiple concurrent PMPI-based tools by enabling users to assemble tool stacks. We extend this basic concept to include new services for tool interoperability and to switch between ...

In our poster presentation at ISMAR'04 [11], we proposed the idea of an AR training solution including capture and 3D replays of subtle movements. The crucial part missing for realizing suc a training system was an appropriate way of synchronizing trajectories ...

In a variety of practical situations such as reverse engineering of boundary representation from depth maps of scanned objects, range data analysis, model-based recognition and algebraic surface design, there is a need to recover the shape of visible ...
